FROM**

**THE HEARTBEAT OF YOUR ENGINE**

**Carlube Triple R fully synthetic low SAPS/  
low ASH engine oils.**

Carlube have developed a range of low ash/low SAPS fully synthetic engine oils to meet the requirements of the latest generation of vehicles with exhaust after treatment devices. Low SAPS (low sulphated ash, phosphorus & sulphur) engine oils are safe for catalytic converters and diesel particulate filters (DPF's). Detergents in standard engine oils can form ash on combustion which can lead to the DPF becoming clogged up by soot, damaging the filter and impairing engine and emissions performance. So it is essential that low SAPS engine oils are used for diesel & petrol vehicles with exhaust treatment systems.
